Quality meets productivity.

The first thing you'll notice about the P-4531i MFP, P-4536i MFP and P-5536i MFP black and white multifunctional systems is the large colour touch screen. It allows you to control all the systems' functions at the touch of a screen, without wasting time studying a complex instruction manual. But internally, the three multifunctional systems also have a lot to offer: high-speed printing, copying and scanning, a high print resolution of 1,200 x 1,200 dpi, and a high level of productivity and flexibility as well as being extremely environmentally friendly. All this, plus, it's quiet as a whisper. So good, it's practically unheard of!

HIGHLIGHTS:

Intuitive: The user-friendly aspects of the P-4531i MFP, P-4536i MFP and P-5536i MFP aren't just limited to the adjustable (approximately 7 inch) touch screen panel; they are most noticeable in the standard HyPAS™ interface for integrating optional customer-specific software solutions and applications. The optional Scan Extension Kit to automatically create text-searchable PDF files is yet another helpful feature. You can configure your system exactly as you need it.

Versatile: The systems offer a wide range of intelligent functions, including 'skip blank pages' or 'ID card copy' for copying double-sided originals in small formats that will subsequently be combined onto one page and printed. But that's not all: Mobile printing and scanning via the free Mobile Print app and printing via Apple AirPrint* or Wi-Fi* round off the package.

Productive: The first page starts after just 5.3 or 4.5 seconds respectively, and the systems print and copy at speeds of 45 and 55 A4 pages per minute. Thanks to the large paper capacity of max. 2,600 sheets, it will be a long while before these multifunctionals run out of steam! The systems also boast impressive performance, capable of scanning up to 60 images per minute.

Economical: Alongside all this functionality and productivity, these allrounders also feature a smart design, whisper-quiet operation and a compact footprint design. They even meet the strictest requirements in terms of energy efficiency – this is good for your budget, and the environment!
